

New connections, new media and new opportunities!

ABOUT US

A 100% national company, Skymidia has been operating in the field of technology associated with advertising for 16 years.

Its structure envelops the company headquarters in Rio de Janeiro (RJ), as well as offices in São Paulo (SP), Belo Horizonte (MG) and Miami (FL-USA).

Some of the largest companies in the country are among our clients: TIM, Vivo, Claro, Nextel, Embratel, Correios, Itaú, Bradesco, Furnas and others.

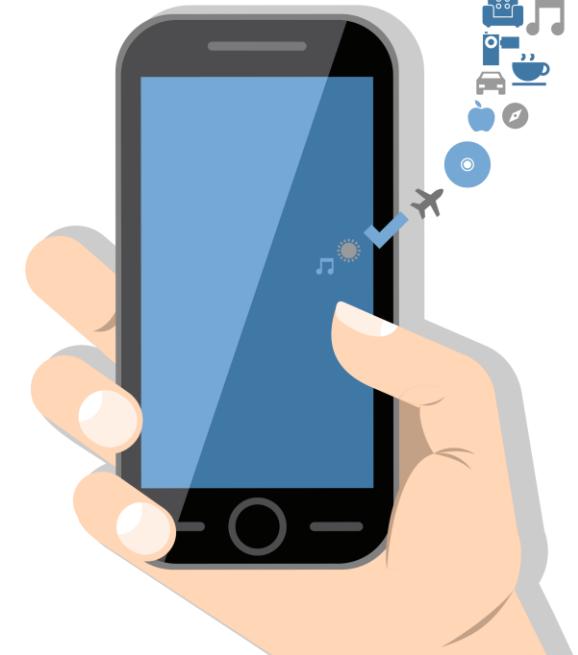

A CONNECTED WORLD

The number of cell phones in the world today has surpassed the mark of **seven billion!**

In Brazil, according to ANATEL (the regulatory agency in the telecommunication sector), the proportion is one cell phone per inhabitant. Recently published demographics show that the country closed out the year of **2014** with **273.5 million** active mobile lines.

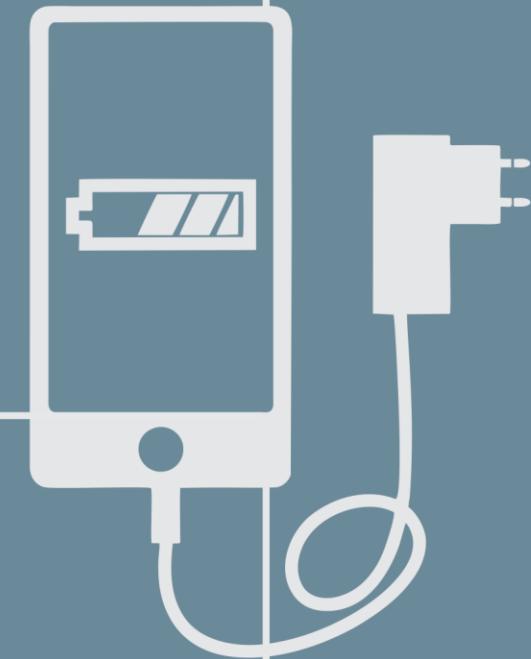

Batteries, however, are the world's fastest-growing industry's most remarkable low point. They always run out when you need them the most!

By associating the charging of batteries with advertising, Skymidia transforms their clients into service providers, reinforcing their brands with a positive subliminal message.
